PROFESSIONAL SUMMARY

Website, Funnel, and Email Designer Virtual Assistant who supports businesses by creating clean, clear, and well-structured designs using Figma. Experienced in designing website pages, landing pages, funnels, and email layouts that are organized, consistent, and ready for development or marketing use. Detail-oriented, easy to work with, and reliable in meeting instructions and deadlines.

WORK EXPERIENCE

CODR — Remote **August 2025 - January 2026**

Website, Landing Page & Email Designer (UI/UX Background)

- Handled the complete design of website and system pages using Figma, from layout planning to final design, ensuring clear structure and smooth workflows.
- Designed clear page flows, dashboards, and layouts that improved information clarity for internal teams and external users.
- Worked closely with developers, project managers, and stakeholders to apply feedback and deliver designs that met business requirements.
- Created responsive designs for desktop and mobile screens for blockchain- and AI-based platforms, simplifying complex content into clean, user-friendly layouts.
- Designed high-quality website pages and email campaign layouts for brands, focusing on visual clarity, typography, and clear call-to-action placement.

Freelance — US-Based Clients (Remote) **July 2022 - January 2025**

Website & Landing Page Designer (UI/UX Background)

- Designed website and landing page layouts using Figma based on client requirements, from initial layout planning to final visual design.
- Worked directly with US-based clients and developers to apply feedback, refine designs, and prepare organized files ready for development.
- Created clean, responsive layouts for desktop and mobile screens, improving clarity, structure, and overall ease of use.

EDUCATION

Mindoro State University - Calapan Campus **June 2021 - June 2025**

Bachelor of Science in Information Technology
